HERITAGE DOCUMENTATION TRAINING GRANT

Eligibility Requirements for Applicants

1. **Appreciation for Cultural Heritage:** We encourage participants genuinely interested in history, architecture, and cultural heritage.

2. **Proficiency in English:** As the program is conducted in English, candidates must demonstrate a solid command of the language to ensure effective communication and participation.

3. **Basic Understanding of Photography Concepts:** If you're familiar with concepts such as shutter speed, ISO, and aperture, you'll find aspects of this course more accessible.

4. **Passion for Technology and 3D Modeling:** Enthusiasm for technology, particularly in 3D modeling, could be beneficial for rapidly grasping the technical aspects of the course. Still, passion, above prior experience, is what we value most.

5. **Commitment to 3-Week Engagement:** Candidates should be able to commit dedicated time to the program for a duration of three weeks, allowing for comprehensive learning and active participation.

6. **Eagerness to Learn and Commitment to Coursework:** The success of your learning journey with us greatly depends on your keenness to learn and commitment to completing assignments. Be ready to explore new techniques, technologies, and ideas actively.

7. **Strong Communication and Teamwork Skills:** This course involves collaborative learning experiences. While not required, good teamwork and communication skills can significantly enhance your learning and contribute to the collective success of the class.

8. **Commitment to Active and Regular Communication:** We expect participants to maintain consistent, detailed communication with instructors throughout the course to address questions, share insights, and discuss progress effectively.

9. **Internet Connectivity/Hardware Recommendations:** For the workshop, it's important to have a stable internet connection so that you can actively participate, share data, and receive feedback from the instructor. Make sure your internet is reliable and capable of file sharing. To effectively use RealityCapture and complete all the steps, it is important to have an NVIDIA graphics card for 3D model meshing. If your computer lacks an NVIDIA graphics card, you won't be able to complete all the steps, but you can still follow along with the workshop.
